

COMBINING IGAMING EXPERTISE WITH LEADING CLOUD INFRASTRUCTURE

FOCUS ON YOUR CUSTOMERS, LEAVE CLOUD TECHNICALITIES TO THE EXPERTS.

Providing a premium player experience in iGaming demands the use of a secure, highly-available, and high-performance cloud-based platform. With dense traffic volumes, complicated software and stringent compliance guidelines, it's key for providers to build partnerships that have the expertise to architect, secure, optimise and support your environment.

Just Eleven's iGaming advisory services, combined with Rackspace's expertise in managing cloud complexity, powers a foolproof strategic partnership that can drive the growth of your business.

WE'LL FIND THE BEST CLOUD SOLUTION FOR YOUR BUSINESS

PERFORMANCE

Our solutions are tailored to accommodate dense traffic volumes with peaky behaviour. Your infrastructure will be deployed to meet the most demanding of online challenges on robust, yet agile technology. The end result is a reliable, high-performance solution, which delivers peace of mind when you need it most.

FLEXIBILITY

Whatever your cloud needs, you'll only pay for what you use and we'll scale as you grow. Our 3,000+ cloud engineers take the complexity out of the world's leading clouds and technologies so you can keep your eyes on innovation, instead of on managing your cloud infrastructure.

SECURITY

An effective security strategy starts with the right people and the right expertise. Having the latest tools is simply not enough to effectively minimise business risk. You need highly skilled analysts to actively patrol the network, identify vulnerabilities and respond appropriately to threats. That's why Rackspace employs top professionals in the field of cybersecurity to ensure customers defend their businesses.

AVAILABILITY

From strategic iGaming business planning with advisory services, to the custom architectural design of our solutions, we provide end-to-end cloud expertise. All backed by industry renowned Fanatical Support® 24x7x365.
